Ceramic Composite Products Quality Policy

QP-01

It is GE Aviation's quality policy to

- provide customers with world-class products and services and obtain customer satisfaction through the application of Six sigma quality discipline and tools;
- maintain quality as a fundamental value in our business;
- move key products, services, and processes toward Six sigma levels;
- establish an environment that focuses leaders and employees on quality improvement of processes, products, and services; and
- continually improve the effectiveness of the quality management system.

David Joyce
President & CEO, GE Aviation

Ceramic Composite Products, LLC is committed to provide superior customer satisfaction by clearly identifying, defining, understanding, and communicating internal and external customer requirements, ensuring that our products and services conform to those requirements by operating within a total quality environment, and embracing continual improvement in the development of our people, products, processes, and services.
